

START

This multi-purpose teaching resource can be used in 3 different ways to help your pupils learn about energy and nutrients.

### 1. QUESTION AND ANSWER

Display the resource and question the pupils about the different foods. You could use the *Bingo questions*.

### 2. BINGO

You will need the *Bingo questions* and counters. Follow the dotted lines to cut the resource into 9 bingo boards. Ask the *Bingo questions*. If the pupils have a food which answers a question, they can cover it with a counter. The first to cover all their food images is the winner.

### 3. BOARD GAME

You will need a die, counters and the *Board game questions*. Players should take turns rolling the die and moving the number of places indicated. If they land on a food image, they must answer a question (read out by another player). If they answer correctly, they can remain on their space, if not, they must go down a row. The winner is the first player to the finish.
